

SHERRYL V. PEÑAFLO

Chin Veloso

AI BUSINESS PROCESS & AUTOMATION SPECIALIST

Business Systems • AI Integration & Tailoring • Workflow Automation • Backend Strengthening
Philippines | +63 976 011 0243 | buildframe.digitalsystem@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Business systems and technical operations professional with management experience and hands-on project work in AI-assisted business software, workflow automation, systems integration, and process improvement. Experienced in analyzing workflows, identifying inefficiencies, and developing practical systems around real operational needs. Hands-on experience includes API-driven workflows, data persistence, third-party integrations, approval processes, validation, testing, and structured business software. Focused on using AI and automation to support people, improve productivity, and create repeatable and measurable business processes.

PROFESSIONAL EXPERIENCE

Regional Manager — PrimeGrid Construction | Jan 2022 – Feb 2025

- Oversaw regional construction operations including project sites, workforce, schedules, materials, suppliers and purchasing, budgets and costs, contractors/subcontractors, and client coordination.
- Managed project documentation and reporting, monitored construction progress, coordinated operational requirements, and oversaw quality and work completion.
- Managed projects including a 12-unit housing development, approximately 1-km perimeter fence, a 750-sqm residential house in a prime subdivision, and two modern piggery projects.
- Coordinated people, resources, suppliers, timelines, and project requirements while resolving operational issues and keeping projects moving toward completion.

General Manager — M-Manuels Goodies | 2015–2022

Managed day-to-day business operations, staff coordination, workflow execution, customer and operational requirements, problem-solving, and management decision support. Identified process issues and bottlenecks, coordinated people and responsibilities, and improved practical operating procedures.

Branch Manager — Albertos Pizza | 2010–2012

Managed branch operations, staff coordination, customer service, workflow execution, and daily operating procedures while maintaining consistent branch performance.

CORE STRENGTHS

Business Process Analysis • Workflow Analysis & Improvement • Automation-Oriented Thinking • Business Operations • Problem Solving • Systems Thinking • Leadership & Coordination • Human + AI Workflow Design

EDUCATION

B.S. Chemical Engineering — Leyte Institute of Technology

B.S. Accountancy — 3 Years — St. Paul's Business School

BUSINESS SYSTEMS & PROJECT EXPERIENCE

BUILDFRAME BUSINESS SOFTWARE — AI Business Systems, Workflow Automation & Process

Improvement

- Analyze business workflows and translate operational needs into practical digital processes, automation opportunities, and structured business software workflows.
- Design, develop, and test AI-assisted workflows with human approval points, structured data, validation rules, and system safeguards.
- Build and verify API-driven workflows, data persistence, CSV-based processes, third-party integrations, and data flow between business processes and systems.
- Develop and test acquisition and outreach workflows with prospect records, approval controls, Do-Not-Contact safeguards, Gmail execution, status tracking, and persisted records.
- Work hands-on with AI-assisted development using HTML, CSS, JavaScript, Node.js, REST APIs, JSON, OAuth, GitHub, and structured application architecture.

SELECTED BUSINESS SYSTEMS & AUTOMATION PROJECTS

BuildFrame Business Software — Custom business operating system focused on modular workflows, process improvement, AI-assisted functionality, integrations, and structured backend processes.

BuildFrame Social Media Management — Publishing and scheduling workflow with approval controls, validation, execution safeguards, status tracking, and persisted publishing records.

BuildFrame Survey Platform — Online survey and structured data-collection system with guided AI-assisted functionality.

Build My Online Food Business — Business platform designed around practical online food-business operations and digital workflows.

M&N Consumer Goods — E-commerce and administrative business platform supporting business operations and structured digital processes.

TECHNICAL CAPABILITIES

AI Integration & Tailoring • Business Workflow Automation • Business Process & Workflow Mapping • AI-Assisted Business Systems Development • Backend Workflow Strengthening • API-Driven Workflows & Integrations • Data Flow & Persistence • Validation Rules & System Safeguards • Human Approval & Controlled Automation • Functional & End-to-End System Testing • Technical Troubleshooting & Retesting

BUSINESS PROCESS & DOCUMENTATION

End-to-End Workflow Mapping • Process Documentation & Operational Procedures • Approval Points, Validation Rules & Safeguards • Business Requirements Translated into System Workflows • Status Tracking & Structured Operational Records • Human + AI Workflow Design

TOOLS & TECHNOLOGIES

Hands-on / Project Use: ChatGPT • OpenAI AI Tools • VS Code • GitHub • GitHub Pages • Cloudflare / Cloudflare Pages • GoHighLevel (GHL) • Gmail / Google Workspace • Google Drive • Microsoft Office • Canva • Meta / Facebook Tools • YouTube • TikTok • Pinterest • CapCut

Technical Exposure: HTML • CSS • JavaScript • Node.js • REST APIs • JSON • OAuth • CSV Workflows • Data Persistence • API Integrations • Structured Data • Validation Workflows • Cloudflare D1 • Database-Backed Workflows
